

QUOTES

Additional copy of the list of contractors used for your project - DOCUMENTATION

If additional contractors are needed to complete the elements of your project, please make sure to list them. For instance, if in your Property Improvement Grant, you are using an excavation company to dig a hole; and a landscaping company to install interlock pavers, you would require two quotes for each of these professional services.

Figure 1 displays a 3x3 grid of scatter plots illustrating the relationship between the number of children and the number of children in the household. The rows represent different levels of the 'Number of children' variable (1, 2, 3) and the columns represent different levels of the 'Number of children in the household' variable (1, 2, 3). Each plot shows a positive correlation between the two variables.

The plots are arranged as follows:

- Row 1: Number of children = 1. Columns: Number of children in the household = 1, 2, 3.
- Row 2: Number of children = 2. Columns: Number of children in the household = 1, 2, 3.
- Row 3: Number of children = 3. Columns: Number of children in the household = 1, 2, 3.

Each plot shows a positive correlation between the number of children and the number of children in the household. The plots are arranged in a 3x3 grid, with the number of children on the x-axis and the number of children in the household on the y-axis.
