

United Counties of Stormont, Dundas & Glengarry

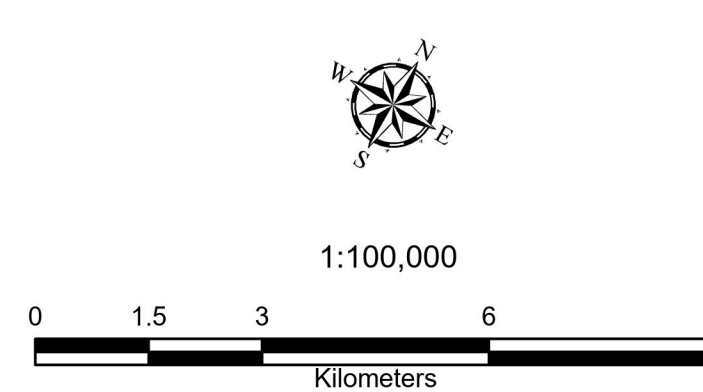

CIVIC ADDRESS SYSTEM

USING THE NUMBERING GRID

1. Find the gridline closest to the house number in the civic address. East-West roads have 5 digit numbers. North-South roads have 4 digit numbers.
2. Run your finger along the gridline, searching for the road name in the township of the address.
3. Where the gridline and road intersect is the location of a home with that house number. House numbers between gridlines must be interpolated. Homes on the South or West side of a road have even numbers and homes on the North or East side of a road have odd numbers.

NOTES:
Many of the boundary roads with townships bordering SDG have been numbered using the bordering townships' numbering system.
This grid is to be used only as a guideline.

- 22,000 Civic Address Grid and Number
- Township Boundary
- Main Settlement
- Other Place Name
- Island
- Railroad
- Highway Interchange
- Highway
- County Road
- Municipal Road
